

# VARITRANS INDUSTRIAL DESIGN

The mobile Varitrans movable wall system  
now also in an expressive industrial design

# DESIGNING ROOMS IN THE INDUSTRIAL LOOK

Striking black struts emphasise  
the loft character of large rooms

## **Flexible room partitioning in a functional, aesthetic design**

With its movable glass elements, Varitrans creates an open atmosphere and separates functional areas without visual barriers. Varitrans offers individual solutions for practically every floor plan and application with a wide range of system components.

With Varitrans Industrial Design, mobile room partitioning can be completed in an industrial architecture look. The style is characterised by struts in the typical shade of black, which revive the rugged charm of old factory floors.

This creates stylish rooms with great transparency and openness, for a modern, creative, feel-good atmosphere.

## **Varitrans Industrial Design – Advantages at a glance**

- Mobile room partitioning in an industrially inspired design
- Stylish black longitudinal and cross struts in RAL 9005
- Movable wall elements up to 4 m high
- Manual or fully automatic operation of the glass movable wall

**Contemporary architectural style:** Transparent room partitioning with a creative factory hall flair

Style 1

Style 2

### Elements in two design variants

Varitrans Industrial Design is characterised by flat aluminium struts coated in the typical black shade of RAL 9005. The struts are mounted on the front of the glass surface with the glass edge visible. All elements have three horizontal struts and can be optionally equipped with two (Style 1) or three (Style 2) vertical struts.
