

VERTICAL LIFE STYLE

FLEXIBLE DESIGN IN RESIDENTIAL APPLICATIONS

VERTICAL LUXURY

FLEXIBLE AND TRENDY VERTICALLY RETRACTABLE WALLS CREATE UNIQUE AND MULTIFUNCTIONAL ROOMS

Skyfold has always had the end-user and architect in mind regarding clean lines, more space, less weight, and ease of operability.

With Skyfold operable walls, you can quickly and quietly reconfigure your space within minutes. With up to an STC 60 (RW 59) acoustic rating, you can easily transform your space from a family room to a formal dining room at the touch of a button. The ease of transforming your space is at your fingertips with a touchscreen controller.

Skyfold stores in a pocket in the ceiling, which in turn means it will take up no floor space whatsoever, all without floor and wall tracks. The Skyfold wall deploys from the ceiling with a simple press of a button.

VERTICAL TOUCHES

A BESPOKE ACCENT FEATURE WALL

Go all out and make the Skyfold wall an accent feature in your space. Choose one colour or finish for the entire wall, mix and match colours, finishes and textures to create something unique and eye-catching, turning your Skyfold wall into more than just a functional element within the space. You can even personalize each side of the Skyfold wall with different finish selections or finish layouts to complement either side of the room. You can even turn your wall into a work of art with a custom mural or graphic image.

Or suppose you want the movable wall to be more inconspicuous. In that case, you can also choose a wall finish that complements the space or that replicates the surrounding fixed walls so that the Skyfold wall looks like a permanent fixture and an intentional design element. Not only will this help to anchor the wall to the overall design theme.

VERTICAL DESIGN

CLEAN DESIGN AND MAXIMIZING SPACE

When natural light is desired, our Mirage wall can provide the perfect setting for bright, sophisticated and welcoming spaces. Its clean lines, lightweight structure, a wide range of glass and plexiglass panels, customizable frame colour finishes, high-efficiency acoustic seams, and ease of maintenance. And the frame colour options are endless. Choose a colour, and we will match it. Feel free to get creative!

Skyfold technology even has added luxury of transparency. Clean lines, a lightweight structure, a wide range of glass and plexiglass panels, high-efficiency acoustic seams, and ease of maintenance make Mirage the perfect solution for bright, sophisticated and welcoming spaces.

POTENTIAL APPLICATIONS
 Palace/villa Majilis | Formal & informal living rooms | Home theater | Bar & recreational areas | Home office | Indoor pool & gaming rooms

Skyfold is pleased to be an official member of the U.S. Green Building Council. The Green Council is committed to promoting better designed buildings that are not only more environmentally and socially responsible, but also help improve the quality of life for those who occupy them and the communities in which they are built. The Council has developed a benchmarking system known as LEED (Leadership in Energy & Environmental Design). When it comes to recycled materials, architects and owners who choose a Skyfold vertically folding operable wall system can calculate the following toward LEED accreditation on their projects. In order to continue protecting our environment, it is essential that we all do our part by using recycled materials whenever possible. Skyfold is proud to help.
